The IPC Hormann GmbH – Independent Product Controlling - is one of the leading international control- & supervision agencies with the main-office in Walsrode, Germany.

Our offer of services covers quality- & safety checks for the agriculture- pharmacy- and chemical branches. This starts by the consultation regarding manufacturing- storage- and transportation methods up to the inspection and controlling, quality assurance and certification of any cargo. Furthermore we carry out raw material analysis, pre-shipment- and unloading controls according to your requirements.

With our worldwide presence in a tight net-work of IPC branches, agencies and partners we are able to offer solutions of all tasks promptly and effectively according to your demands. Our service ensures your security, increases the added value of your products and will contribute to your success in the global market.

Our customers are worldwide renowned companies, the majority of these are being served by us for a long time. In over 10 years, trust in our services and reliability have made us a reliable partner in the product control.
